* Kitchen and Flooring Center Inc, cannot be held liable in any case of action resulting from the product use in any form. The purchaser must determine suitability and maintainability of the material for any use. We makes no expressed or implied warranty of fitness for any particular purpose. Porcelain products inherently vary in shade and caliber; therefore, to ensure customer satisfaction, examine all the tiles prior to installation. We recommend selecting tile from same shade and caliber (i.e. same size and numerical shade), mixing tiles from different boxes, and rotating the tiles to avoid repetitive patterns during installation. To achieve a lippage-free rectangular tile installation, it is suggested to utilize a minimum 1/8" grout joint and an offset between 15% and 30%. Porcelain tiles can be cleaned using warm water and a cloth or mop. For deeper cleaning, we recommend using a neutral cleaner or a diluted white vinegar and water solution. (Do not use abrasive cleaners or sponges or cleaning agents with strong chemicals as this may harm the material. The vendor disclaims any liabilities after installation.)
